April 19, 2017

Beginning July 1, 2017 and for the remainder of the 2017-2018 school year, the IC3 Computer Course will not be offered as an approved Veteran Program class.

This decision was made due to recent changes imposed by the California State Approving Agency of Veteran Education (CSSAVE) in regards to the process of applying for course approval.

We were recently informed of a change to the application process for obtaining and maintaining approval for VA Approved classes. We are required to annually submit job obtainment reporting information for all classes that we offer in our CTE Program. Failure to submit the information required results in termination of our CSSAVE approval and the ability to offer courses for VA Education Benefit.

Unfortunately, we do not have current job obtainment information for the IC3 Program to support IC3 approval for the 17/18 school year. Our hope is that the students graduating in June will enter the job market and successfully gain employment based off of the skills and training they received in the IC3 program. Once we have collected viable job obtainment information for the course, we will once again submit the course information to CSSAVE for approval.

We apologize for any resulting inconvenience.
